Verbal reasoning (English)

1 Select the RIGHT answer

Three pirates were killed late Friday during a presumed attack in error, while other pirates successfully hijacked the Yuan Xiang, a Panamanian-flagged vessel with an all-Chinese crew, and a media embargo was lifted regarding the release of a British couple whose yacht was seized more than a year ago over the weekend.

At 11 p.m. on Friday a Kenyan patrol vessel was near Kilifi in Kenyan coastal waters "when four suspected Somali pirates on board a speed boat climbed the vessel, mistaking it for a merchant vessel," according to Kenyan Defence Department spokesman Bogita Onger. He said three were shot dead but the fourth "dived into the sea with bullet wounds during the scuffle," and is thought to have died. The speed boat with more pirates on board fled, the three bodies were taken to Coast General Hospital, Mombassa.

Onger promised more details after discussions with the vessel's captain adding, "[t]he government will not relent in its fight against piracy." Kenya, along with the Seychelles, performs international prosecutions of pirates, but convictions are rarely secured; 26 suspects were freed last week by Kenya owing to lack of evidence or jurisdiction.

Andrew Mwangura of the Seafarers' Assistance Program said Saturday, "I can confirm the pirates hijacked Yuan Xiang on Friday at midnight Kenyan time in the Arabian Sea near India. The vessel has 29 Chinese crew." The Yuan Xiang was sailing outside the zone covered by a multinational task force combating piracy. Reports suggest its captors are heading to Somalia.

Retired British couple Paul and Rachel Chandler were released after their yacht Lynn Rival was captured near the Seychelles en-route to Tanzania 388 days ago, in October 2009. An injunction prevented reporting the release until 56-year-old Rachel and 60-year-old Paul, from Kent, were out of Somalia.

Last year saw 217 hijack attempts. This year, to date, 140, and 40 ships seized - versus 47 for the whole of 2009

Source: Wikinews

- A The chinese Yuan Xiang vessel and all 29 crew have been hijacked. The pirates may be heading the vessel to Somalia.
- B Paul and Rachel Chandler were hijacked for 388 days, now they are free and out of Somalia.
- C Four pirates attacked a kenyan patrol on Friday, resulting on the death of at least three of them and their corpses being taken to a hospital.
- D There have been around 37 less hijack attempts in this year as in the previous one.

2 Select the RIGHT answer

A 40-year-old man from the United Kingdom has survived an operation in which he was given a wholly artificial heart. It is believed that this is the first time in the UK that a patient has been able to return home with such an implant.

Matthew Green, a father of one, experienced the operation in Papworth Hospital, located in Cambridgeshire, England. His health has declined over the last few years, and he has suffered a substantial heart disorder, identified as arrhythmogenic right ventricular dysplasia (ARVD). He is waiting to have a human heart implanted. The disease would have claimed his life had the operation to implant a plastic heart not occurred. Approximately nine hundred operations of this nature have already taken place worldwide.

Having survived the transplant, Green stated that the plastic heart will "revolutionise" his life. "Before I couldn't walk anywhere," commented Green. He described his ability "to be with normal people again" as "fantastic". Having the opportunity to live a relatively regular life "means the world" to Green.

Providing a nine-and-a-half litre blood flow at its peak, the plastic heart can provide roughly twice that of a resting human body. The artificial heart was implanted last June in a six-hour operation. Unlike other mechanical hearts, Green's heart is powered by a pump that can be transported in a handheld bag.

Source: Wikinews

- A** Green needs to carry the handheld bag anywhere he goes. A future human heart transplant could improve his condition.
- B** Green is able to walk and run again as before he was diagnosed with ARVD. His plastic heart is able to pump blood twice as fast as a normal one.
- C** From time to time, Green needs to carry a handheld bag in order to recharge his artificial heart, that allows him to have an almost regular life.
- D** The artificial heart received by Green is the first in the world to be implanted successfully.
